

NEW JERSEY
Crash Records Portal

New Jersey Crash Records Portal (NJ Crash)

Bridge the information gap with New Jersey Crash Records Portal

*Now you can access accurate, complete and timely statewide
crash data from one centralized repository*

We want to help you focus on what really matters— strengthening public safety

The New Jersey Department of Transportation (NJDOT) is excited to offer a new and no cost crash reporting solution for New Jersey law enforcement agencies, the [New Jersey Crash Records Portal \(NJ Crash\)](#).

NJ Crash was developed to allow New Jersey law enforcement agencies to easily share and analyze crash data to create safer roadways and save more lives. By seamlessly bridging the gap between disparate crash reporting processes and data, agencies like yours can focus on what really matters—keeping your community safe.

New Jersey
Department of Transportation

U.S. Department of Transportation
Federal Highway Administration

Agencies using NJ Crash can submit reports electronically to a centralized NJDOT repository, improving the accuracy, integrity and quality of crash data. Analytical tools enable your agency to learn where crashes are occurring in near real-time, leverage data for safety grant requests and much more.

NJ Crash can help your agency:

Simplify crash management by electronically collecting, validating, storing and sharing reports with local, state and federal partners

Support compliance with Model Minimum Uniform Crash Criteria (MMUCC) data standards

Improve public safety with 24/7 access to deeper insights from enhanced analytics and digital crash mapping capabilities

Features designed for accuracy and efficiency:

- Easy and efficient crash report capture at the scene, including a mobile app (IOS and Android compatible)
- Driver's license and registration scanning capabilities
- Voice-to-text and smart narrative
- Integrated diagramming software
- Ability to export crash data back to your RMS
- Configurable Report and Review process
- Options to automatically print redacted reports
- Ability to store associated digital photographs
- Analytical tools to map, query and create custom reports
- Reliable web-based or local client application options
